FTX-602-PWR+

### Reliable Fiber Optic Thermal Monitoring

OSENSA's PWR+ series fiber optic temperature transmitter offers scalable industry leading performance. Each signal conditioner accepts either three or six optical fiber sensor inputs for convenient three-phase monitoring of hot spots in generator and transformer windings, on bus bars in switch gear, or critical connection points on transmission cables and circuit breakers. The FTX-602-PWR+ and FTX-302-PWR+ are powered by 12-24VDC and include isolated RS-485 serial connectivity over industry standard Modbus RTU protocol. Multiple transmitters can be connected in series on a standard 35mm DIN rail with power and RS-485 communication supplied by the five-pin T-Bus connector.
